

Facts About Birds

1. **Feathers:** Birds have feathers that serve for insulation and, in many cases, enable flight.
2. **Flight:** Many species can fly, aided by lightweight skeletal structures and specialized wing shapes.
3. **Egg-Laying:** They lay eggs to reproduce.
4. **Beaks:** Birds have beaks or bills, which they use to gather and eat food, as well as to groom themselves.
5. **Communication:** They communicate through vocalizations such as chirping, singing, and other calls.
